(54) Title: SYSTEM FOR DISPENSING A SUBSTANCE

(57) Abstract: A system for dispensing a substance comprises a compressible container (2) for a stock of substance that is to be dispensed, which container has an outlet member (3) for dispensing substance from the container, and a dispensing of substance from the container. The device has a housing (10) with a chamber (11) for accommodating a compressible container, which chamber has a substantially vertically extending peripheral wall (2) and an opening (13) at the top side for placing the container in the chamber from above. Furthermore, the device has a counter-supporting member (15) for the top side of the container, which countersupporting member can be placed over the opening at the top side of the chamber after the container has been placed in the chamber.
